Cannulas guarantee a high wearing comfort and a stable luerlock connection during sleep screening and sleep studies (PSG). Soft nasal prongs provide maximum wearing comfort, especially for long wearing periods. Our range of nasal cannulas come equipped with a luerlock connection which offers a universally secure connection to your device. Ideal for use in sleep studies (PSG, PG, Sleep Screening, HST) to measure flow and snoring. ISO Approved.

Features:

- Medical grade PVC, phthalate and latex free
- Universal Luer-Lock connection
- Compatible with most PSG systems
